

OSPs with approved rates above the benchmark should be required to warn consumers that their rates "exceed benchmarks established by the government" and to instruct the caller to request a rate quote.<sup>58</sup> CompTel opposes this proposal because it is both unnecessary and inconsistent with the concept of a rate ceiling.

Unlike the NAAG proposal or its variants, which begin with the implicit assumption that the rate charged is unreasonable, the APCC proposal would burden a rate that has been found, after a full hearing, to be a reasonable rate. The Rate Ceiling Proposal uses a benchmark as a "rule of thumb" to distinguish between rates needing extensive investigation and those that do not. The standard for assessing the rate remains the same, however: whether the rate is just and reasonable. If a carrier successfully justifies an above-benchmark rate, that rate is a "reasonable" rate, just as a below-benchmark rate is. Since both rates are reasonable, differential treatment of the carriers offering the rates is inappropriate. One carrier should not be handicapped with the additional expense and call set-up delay that such a disclosure would create, when the Commission already has concluded that its rates are reasonable.

#### **IV. CONCLUSION**

For the foregoing reasons, CompTel submits that the time has come to adopt an alternative to BPP. BPP's costs and disadvantages outweigh any benefits it is promised to engender. Moreover, the coalition Rate Ceiling Proposal is a workable and effective response to the lingering concern regarding excessive operator services rates. The

Commission should adopt the Rate Ceiling Proposal, and should revisit the 0+ in the public domain alternative to address other inequities in the operator services market. It should reject the NAAG proposal and the several variants thereof suggested in this docket.
